

## Team Contributions:

As a team all of us collectively worked together to achieve our goal of developing a web application to manage and track delivery details for trucks issued by suppliers. We divided the tasks from PBI amongst ourselves while still helping each other and collaborating so as to reach our goals before the deadline of each sprint.

Although different people focused on different parts of the project, we all contributed equally on all aspects.

## Individual Contributions:

Name	Contribution
Anuj S M (Employee ID:5402) (Product Owner)	Design, Coding Entity, Security, Repositories, Controller, business service classes, database linking(h2), Coding standards verification, Comments in code, Basic HTML and JSP Coding and project planning.
Dheeraj B N (Employee ID:5406)	Design and planning, Coding Entity, Security, Repositories, Controller, business service classes, database linking(h2), Coding standards verification, Comments in code, Basic HTML and Jsp coding and project planning.
Harshith V (Employee ID:5408) (Scrum Master)	Front end designing UI (Bootstrap, CSS, HTML) Comments in code, JSP Pages Routing, Coding Entity, Repositories and project planning.
